Whats new in the Vineyard

The summer of 2021 was one to remember. We had an early bud break and flowering after a dry spring season. Record breaking heat ensued at the end of June after we had already set fruit. This was followed by another three days of over 100 degree temperatures in July. This will go down as one of the hottest summers ever at Lenné.

Fortunately mother nature smiled at us in August with below average temperatures during the most critical time of ripening. The 2021 vintage should be stellar.
