Whats new in the Vineyard

June is a critical time of year in the vineyard and the time when the fruit sets. Fruit set is complicated and depends on heat and light as well as the conditions in the vineyard in the prior year when the bud forms. As of the 5th of June we are already seeing flowering and we will see how far it progresses before the rain comes on Saturday.

Cool weather and rain are not welcome during bloom and generally lead to a smaller crop. All in all it is a very normal year in terms of weather though our May was atypically dry. Now we keep our fingers crossed and wait for the fruit to set.
